Final Fly-T

Horse Spray and Wipe On Insecticide

Kills and Repels:

- Horse Flies
- Deer Flies
- Stable Flies
- Barn Flies
- House Flies
- Face Flies
- Mosquitos
- Gnats

Active Ingredients:

Pyrethrins	0.1%
Piperonyl Butoxide	1.0%
Butoxypolypropylene Glycol	15.0%
Other Ingredients	83.9%
	100.0%

Final Fly-T has been especially developed for use on horses. It provides a protective hair coating against flies while imparting a high sheen to the hair when brushed out. 1 to 2 ounces per head per day gives adequate protection. Apply by either a soft cloth or fine mist spray.

USE TO WIPE ON: First brush animal to remove excess dirt and dust. Moisten (but do not wet to the point of dripping) a soft cloth and rub over the hair. It is best to apply by rubbing against the hair growth. Give special attention to the legs, shoulders, shanks, neck and facial areas where flies are most often seen. Only a light application is required. Avoid using an excessive amount on your horses. Do not wet skin. After application, brush out thoroughly to bring out sheen on coat. Repeat daily as required.

USE AS A SPRAY: **Final Fly-T** may be applied as a fine mist spray to stable area and over and around stabled horses for fast paralysis and kill of flies. Do not wet horses skin or exceed two ounces per application.
